

JUNE LAUNCH ACCESS

Ola, we need 4 keys.

The new website is live. To finish the June setup, we need the right access—not passwords in text—so we can redirect old traffic, turn on email, and connect ordering safely.

Ni Biashara

BUSINESS SYSTEMS

ACTION NEEDED MONDAY, JUNE 1

Bring or approve access while we sit together.

Best path: you log in, invite us as collaborator, or approve changes live. Do not send passwords, card numbers, API keys, or recovery codes in WhatsApp/text/email.

Once the four items below are available, we can test everything in order and show proof before anything customer-facing changes.

Fast status

New site live

mmafricankitchen.com works.

Old site separate

m-mafricankitchen.com still needs redirect access.

Integrations waiting

Square, Uber, POS, mailbox need access.

The 4 keys

1 / DOMAIN

Old website access

StormerHost, registrar, cPanel, or WordPress access for **m-mafricankitchen.com**

Unlocks: old links redirect to the new site.

2 / EMAIL

Mailbox choice

Choose Google Workspace or another provider for **@mmafricankitchen.**

Unlocks: info@, orders@, events@.

3 / SQUARE

Square production

Square Dashboard/Developer access plus the production location ID.

Unlocks: checkout, payments, order records.

4 / ORDERS + POS

Uber + TouchBistro

Uber Eats Manager/store access, TouchBistro admin/manager, Grubhub status, and new POS name.

Unlocks: less manual retyping, cleaner migration.

What happens after access

Sign / notarize

Agreement first

Collect access

No secrets in text

Test safely

Read-only first

Redirect old site

Customers land right

Turn on email

Send/receive verified

Connect orders

One ticket, no duplicates

Decision shortcuts

Email recommendation: Google Workspace. One paid admin inbox can power aliases/groups for info@, orders@, and events@.

Uber/POS fallback: if direct API access is blocked, approve a kitchen-ticket bridge while partner access is requested. Keep Grubhub → TouchBistro untouched.

Backup host: approve a cheap static mirror so the site has a tested fallback if Netlify has an outage.

Public site: mmafricankitchen.com · Old site needing redirect: m-mafricankitchen.com

Prepared by Ni Biashara for M&M African Kitchen & Bar. Production/DNS/payment/POS changes happen only after approval and verification.
